

Browser Settings for Internet Explorer, Firefox, Chrome

Microsoft Internet Explorer Browser Settings

1. Enable Script on Internet Explorer 7, 8 & 9:

In Internet Explorer click on the **Tools** button (step 1) located in the upper right part of the screen (just next to the gear-wheel icon), and then select **Internet Options** (step 2) as shown in the picture below.

Click on the Security tab (step 3) and then click on the Custom Level... button (step 4).

Scroll down (step 5) until you can see options as shown on the picture. They are located near the bottom of the list. Set the option **Active scripting** to **Enable** (step 6). Click the **OK** button (step 7).

You now have two options depending on how much you want to restrict cookies:

• No restriction (recommended)

Set Firefox will: to Remember history (step 1) and then click OK.

6	History		
1	Firefox will:	Remember history	

• Restrict to selective sites.

Note: Using this method you will have to enable cookies for every site you need them on.

Set Firefox will: to Use Custom settings for history (step 1).

- If Accept cookies from sites is checked, then it will accept cookies from all sites.
- So if you want to choose which sites to allow cookies for, then first **uncheck** this option (step 2) and then click **Exceptions...** button (step 3).
